

List of Our products Giving consideration to Humans and the Environment

As of Jul. 1st, 2020

segment	Product photo	Product name Function and usage	Concept of the considering topics for human and environment											
			Safety in use	To improve the work efficiency	Water pollution preventive	Effective use of water resources	Preventing global warming	Preventing air pollution	Vibration and noise reduction	Waste reduction (Recycling promotion)	Improving the living environment	Contribution to medical	Biological diversity	
Industrial Machinery		Slurry Pumps Slurry transportation												
		Slurry Pumps for Mud Shielding Long-distance transportation of high concentration fluid												
		Sewage Pumps Sludge transport												
		Electrostatic precipitators Removal of air pollutants												
		Electrostatic precipitators for tunnel construction Removal of air pollutants during tunnel construction												
		Enclosed suspended conveyors Excavated vertical transport equipment												
		Pipe conveyors Transfer equipment with less excavation scattering and falling												
		Large-scale Transport Conveyors Transport equipment for mass transportation of large lump												
		Crushers Crushing equipment for rocks, alloyed iron, etc.												
		Screen Sorting equipment for minerals												
		Grinders Crushed stone / crushing / crushing equipment												
		Briquetting Machines Dry granulation equipment for powder												
		Drum Scrubber Cleaning and grinding equipment for large chunks to fine-grained products												
		Tokénite Downsprue Bush (Casts down sprue bush with erosion resistance) Inlet parts for casting molds for automobile engines												
Rock Drill Machinery		Hydraulic breakers Crushing and rock drilling equipment												
		Hydraulic crushers Concrete subdivision, crushing equipment												
		Hydraulic crawler drills Drilling machine in mines												
		Tunnel drill jumbos Drilling machine for tunnel construction												

segment	Product photo	Product name Function and usage	Concept of the considering topics for human and environment										
			Safety in use	To improve the work efficiency	Water pollution preventive	Effective use of water resources	Preventing global warming	Preventing air pollution	Vibration and noise reduction	Waste reduction Recycling promotion	Improving the living environment	Contribution to medical	Biological diversity
UNIC Machinery		Truck-mounted UNIC Cranes Lifting equipment											
		UNIC Carriers Transportation equipment for various vehicles such as passenger cars											
		UNIC PAL Handling equipment for wood, industrial waste, etc.											
		Mini-crawler cranes Lifting equipment											
		Ocean Cranes Marine lifting equipment											
Electronics		Aluminum nitride ceramics Parts for semiconductor manufacturing equipment											
		High purity materials for semiconductor Electronic device, light emitting device											
		Optical products Optical parts for laser cutting machine											
		Line filter cores and coils Automotive electronic control components											
Chemicals		Cuprous oxide Antifouling agent for ship bottom paint											
		Polyferric sulfate solution Flocculant for treating sewage and night soil											
		Aluminum sulfate solution Flocculant for making drinking water											
		Ferrous sulfate Supplement ingredients, food additives
